OSSIX™ Bone

Ossifying Collagen Sponge

For Guided Bone Regeneration (GBR) & Guided Tissue Regeneration (GTR) Procedures

Powered by Clinically Proven GLYMATRIX® Technology
What is OSSIX Bone?
OSSIX Bone is a sponge-like ossifying block for true bone formation, powered by clinically proven GLYMATRIX® technology.
- Hydroxyapatite and sugar cross-linked collagen matrix
- Provides a spacious environment for vascularization, cellular proliferation and bone maturation
- Bone forming material that contributes to the ossification process

OSSIX Bone Features & Benefits
- Easy to use
- Undergoes ossification*
- Provides true bone (no remnants)
- No migration of particles
- Cost effective for Doctor and Patient
- In socket preservation and closed sinus elevation can be used without a membrane
- Predictable results and consistent efficacy

OSSIX Bone Can Be Used
- For socket preservation following any extraction procedure
- In closed sinus augmentation procedures prior to, or in conjunction with implant placement
- In lateral and vertical bone augmentation prior to, or in conjunction with implant placement
- To correct bony defects in implants with peri-implantitis
- In periodontal bony defects around teeth

* Alveolar Ridge Restoration Using a New Sugar Cross-linked Collagen-Hydroxyapatite Matrix in Canine L-shape Defects.

Please refer to the IFU before use and for the information on indications, contraindications, warnings and precautions.
Using OSSIX Bone Ossifying Collagen Sponge

OSSIX Bone is held at the socket orifice and hydrated with patient’s blood until fully soaked. In socket preservation it can be used without a membrane, tension free suturing.

Datum Dental at a Glance
Datum Dental Ltd., a subsidiary of Datum Biotech, provides innovative dental regeneration products, aiming to support and enhance the future of implantology and oral care. Its patented GLYMATRIX® core technology, a sugar cross-linking collagen biomaterial, is clinically proven in over 100 scientific publications with extensive clinical experience spanning two decades. Powered by GLYMATRIX, the OSSIX product family has enabled clinicians in hundreds of thousands of procedures worldwide to safely provide predictable, long-term results to their patients. Datum Dental continues to develop new products for GBR and GTR that simplify procedures and overcome major deficiencies in existing biomaterials through safe and transformational solutions.
