

Quality Policy

Datum Dental develops and manufactures medical devices based on its proprietary technology to address dental surgical needs and is committed to providing patients and dental surgeons with high quality medical devices that are proven to be safe and effective for the purpose for which they are designed.

The management of **Datum** regards quality as the highest priority and commits to meeting the requirements of patients and clinicians, applicable regulatory requirements and the quality principles described in the Quality Manual by:

- Establishing, maintaining and promoting culture of quality by ensuring **Datum's** Quality Management System is in compliance with the applicable regulations and standards, by providing adequate resources, and by enhancing the skills of all our personnel in order to maintain the continuing effectiveness of the Quality System
- Maintaining appropriate feedback processes to ensure we are constantly aware of, and can speedily address, the concerns of our customers
- Ensuring our products are produced to the highest level of quality by implementing proper control of their design with appropriate transfer to manufacturing with control of on-going production activities to meet the design specifications

At **Datum**, Quality is Everyone's Responsibility
